I'm Possible Training

Business Niche: Sports / Educational

- **Rating:** 3.9 Stars
- **Downloads:** 2,000+
- **Append:** SWIFT (iOS) and Java Android

Technology:

- **Backend Technology:** Laravel

Brief:

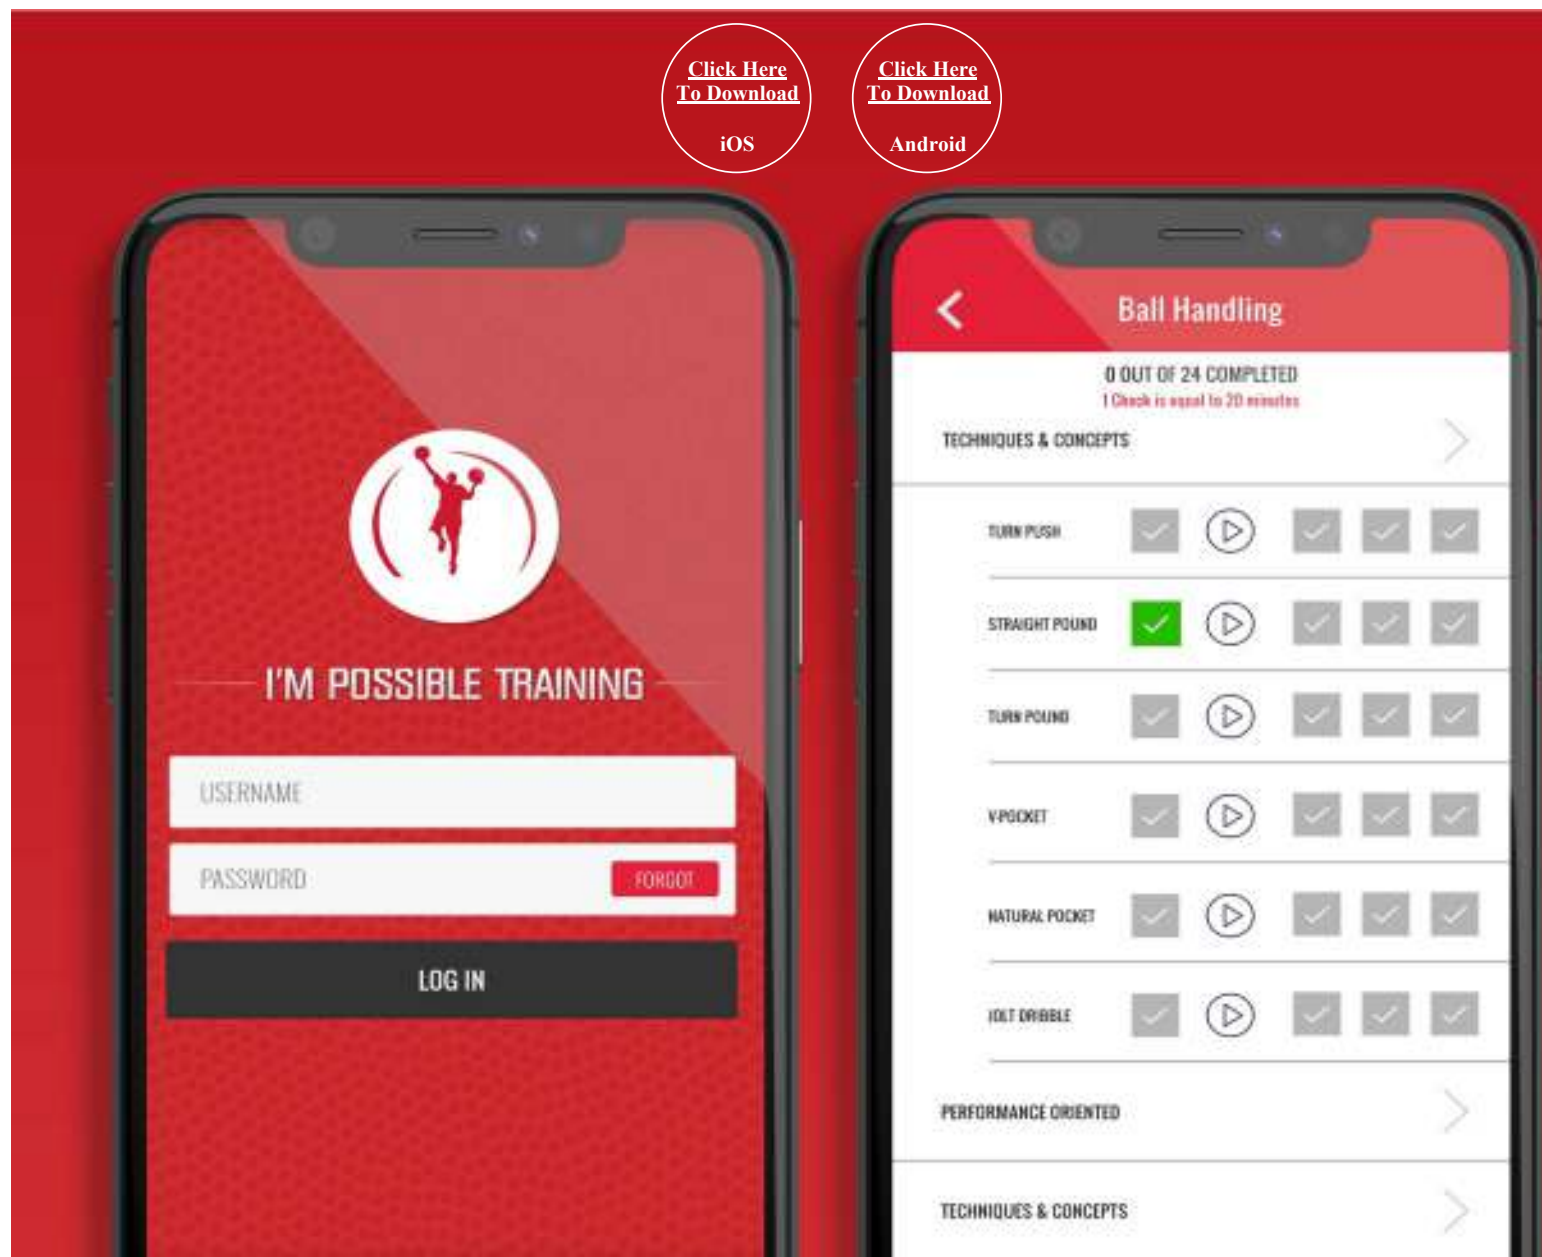

It is a closed app that serves only the students and trainers who are a part of the IPT community.

Possible Training is an App that we created for All Star NBA player Micah Lancaster.

The app is a product that allows the trainers and players communicate on the routine that they have to follow during their practice sessions.

Trainers can allot a set of activities to the players and monitor their work out logs.

Players can as well view the videos available for them to learn the skills.

Shop Angel

Business Niche: Marketing Management (E-commerce)

URL: Private

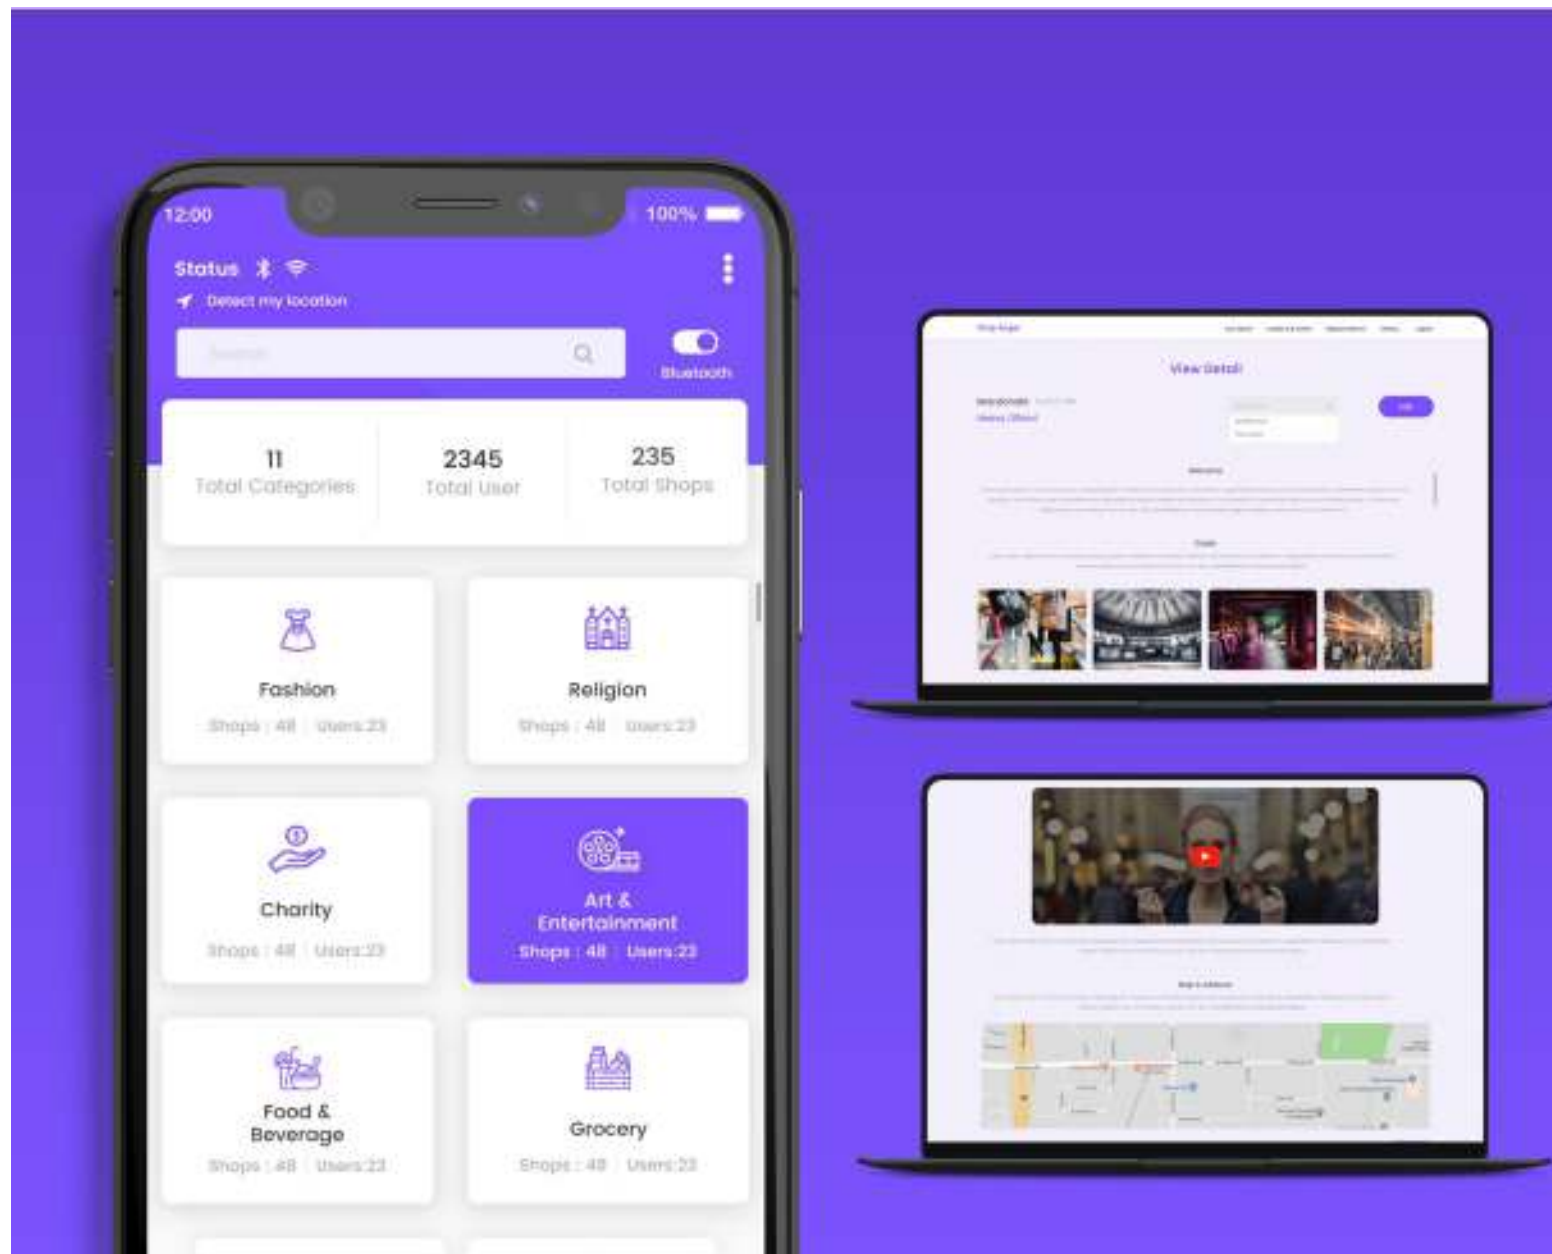

Reason: It is a SAAS that is sold to the clients who are interested in taking the service.

----- Brief:

Shop Angle is a Beacon based application that allows the user to connect with the nearest beacon devices to receive offers available in store.

A separate mobile app for store owners allows them to create offer and manage beacon devices available.

An admin panel for Super admin allows to control the devices, data of the store and the operational status of the devices.

Taper

Business Niche: Grooming / E-commerce

• **Rating:** 4.8 Stars

• **Downloads:** 10,000+

• **Technology:**

• **Native iOS:** SWIFT

Technology:

• **Background Technology:** CodeIgniter

Brief:

Taper is a salon niche of product that we have worked on.

The app allows the stylists and the customers to interact with each other.

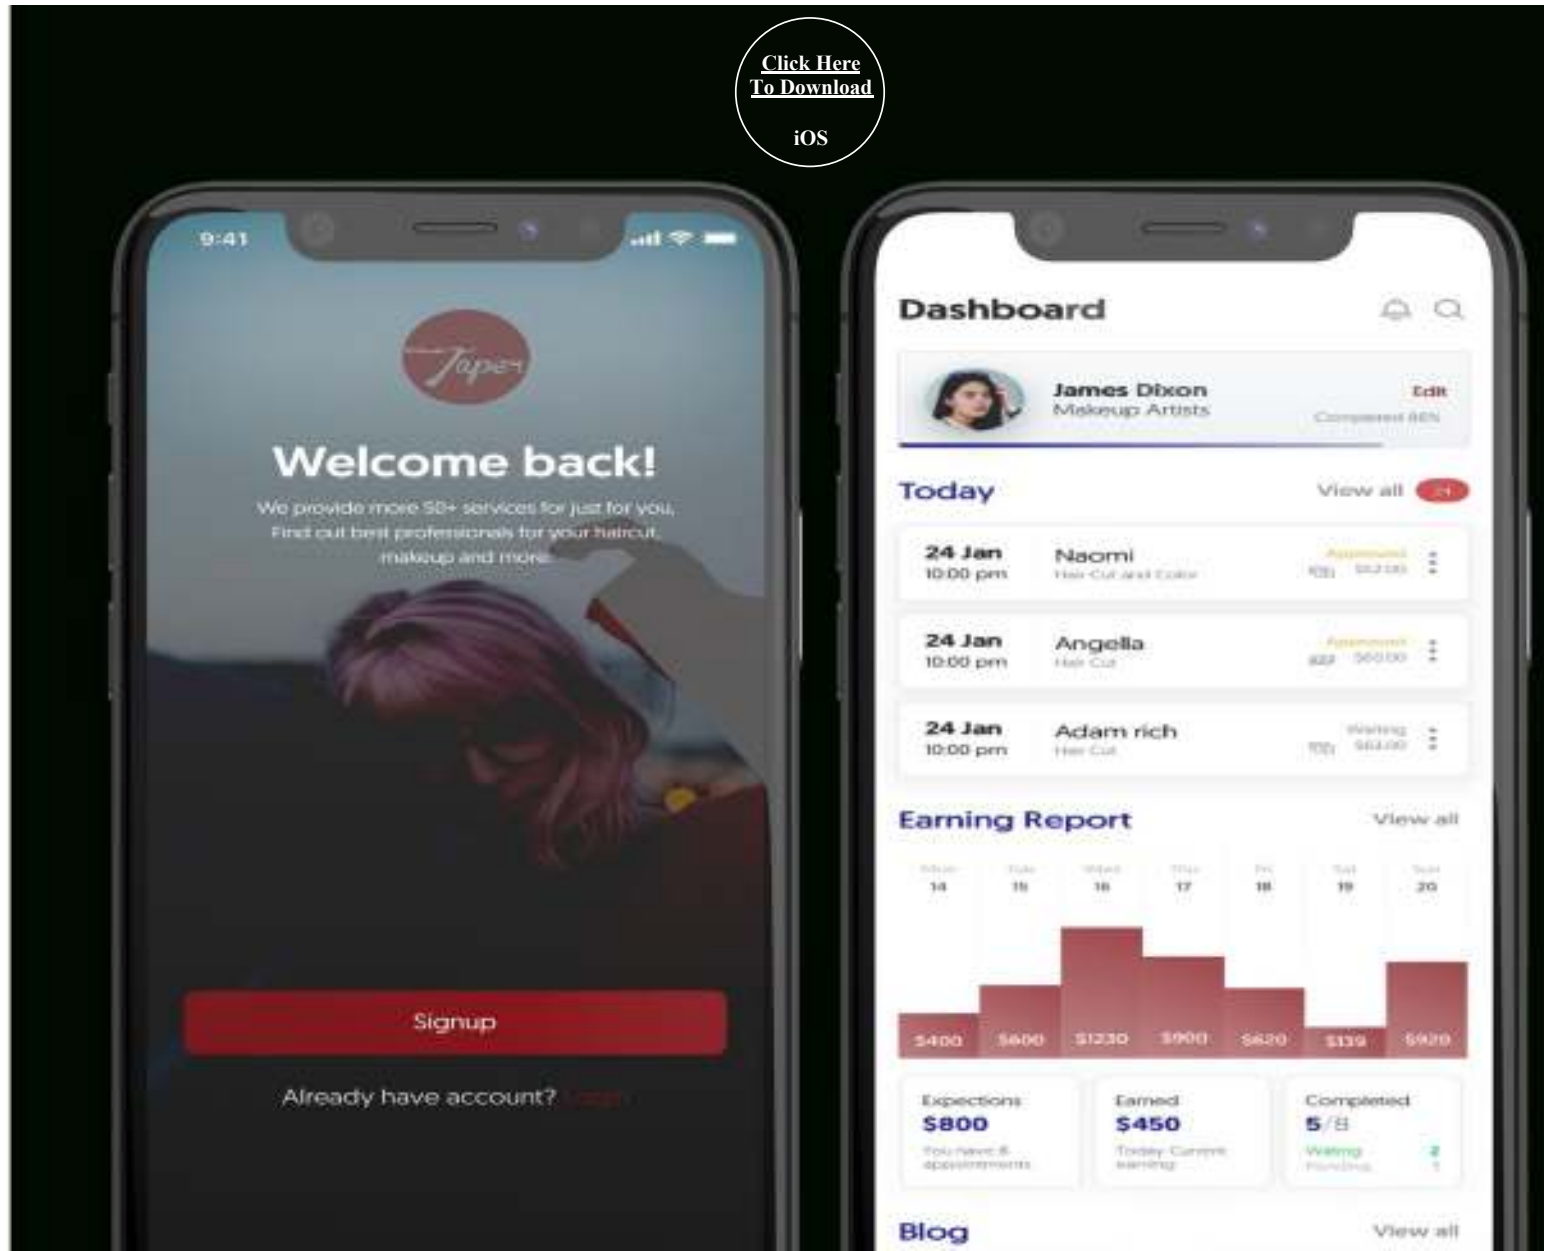

App allows the user to take appointments from the stylists of their choice and make payment via the app.

Stylist and Admin has special features to monitor their earnings made by them via the app.

There is built in wallet functionality on the app as well.

iOS

Vendour

Business Niche: Retail

- **Rating:** 4.1 Stars
- **Downloads:** 10,000+
- **Native:** Java

Technology:

- **Backend Technology:** Laravel

Brief:

The app allows the user to find the nearest vending machines on the app that they could use.

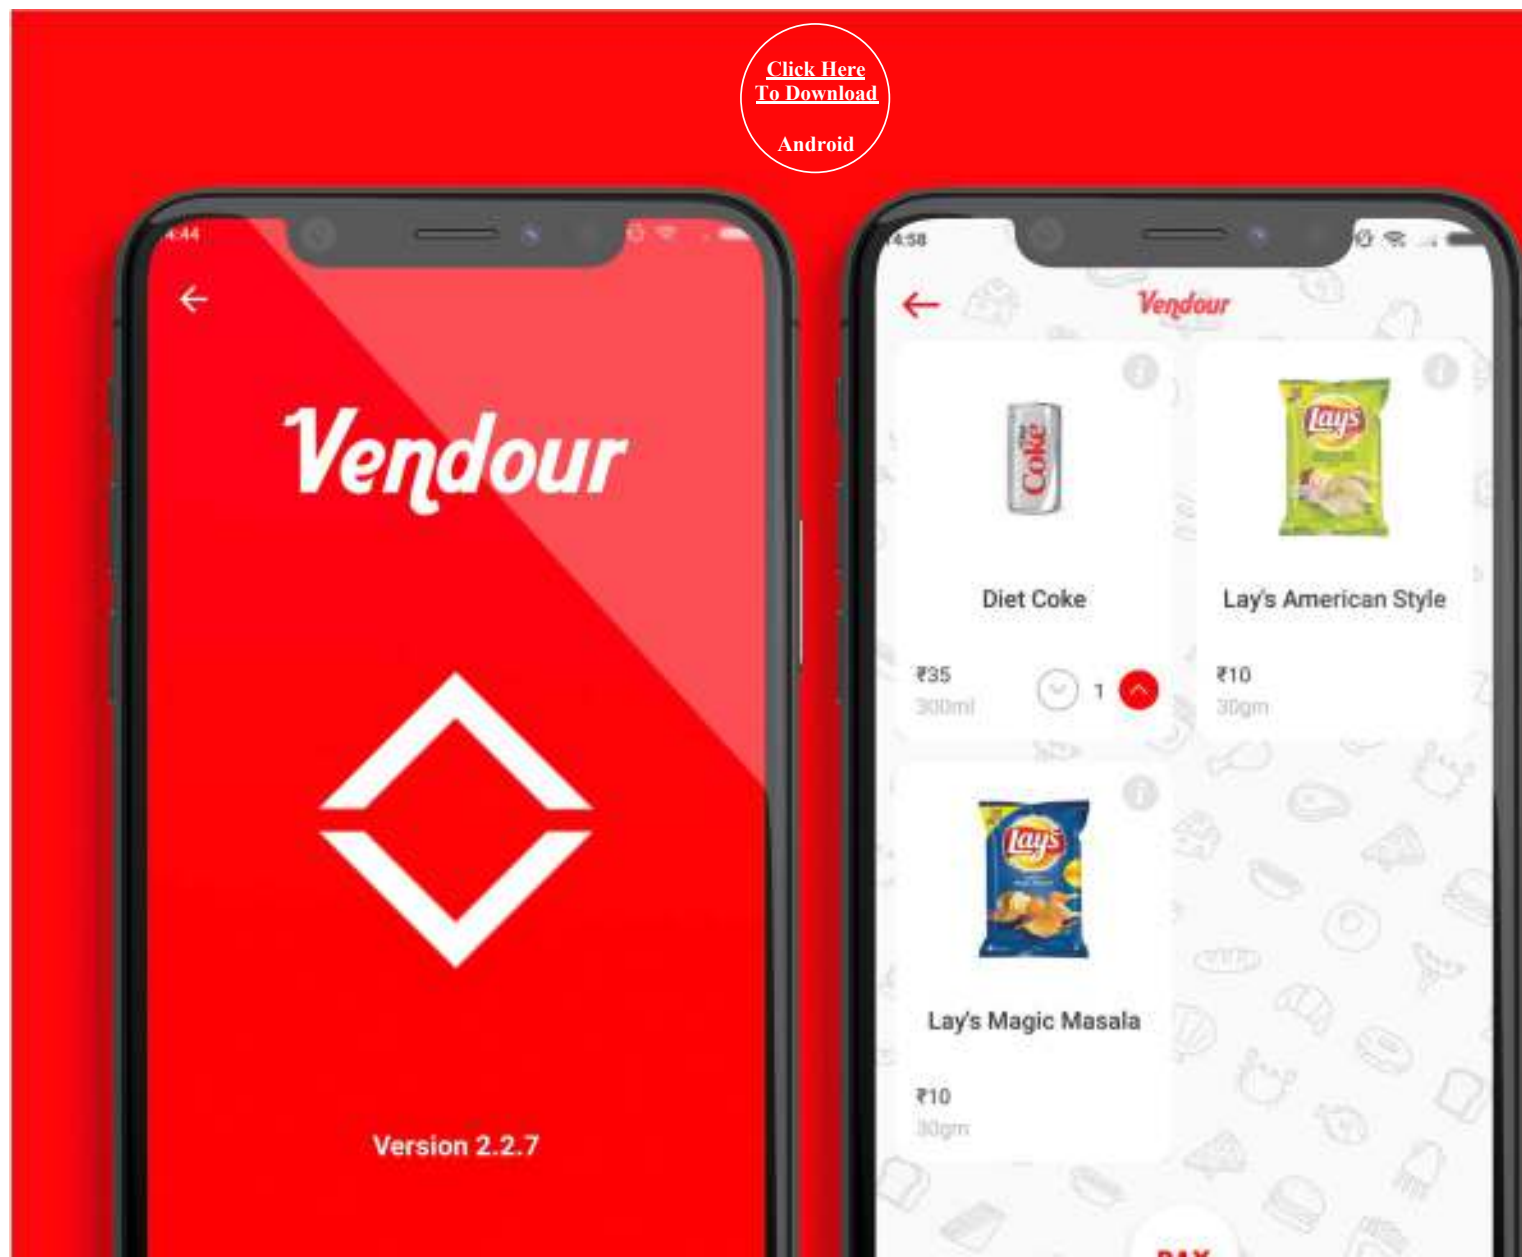

The interaction of the of the app with the BLE devices in the vending machines allows the user to make a transaction from the app itself.

Wallet functionality available on the app allows the user to make online payments and also obtain refunds.

We also created a admin dashboard that allows the admin to view the earnings and as well as manage the inventories level of the vending machines.
