Testimonials

Empowering People

"I wanted to express my sincere appreciation for the Peloton team that worked on our Account Reconciliation Cloud (ARCS) implementation. As the ARCS Administrator, Peloton made sure I understood the inner-workings of the overall solution they built for us. They are always listening and very easy to collaborate with."

Built on a Culture of Innovation

"With the rapid growth of our business, we were caught off guard with the enormous spike in volume. Peloton not only helped with current issues in our ERP Cloud but also addressed several key items that helps us get ahead."

"Previously, we were only able to provide monthly reports to leadership and our clients. After working with Peloton on our new ERP and EPM Cloud environments, we are now able to provide information with near real-time updates."

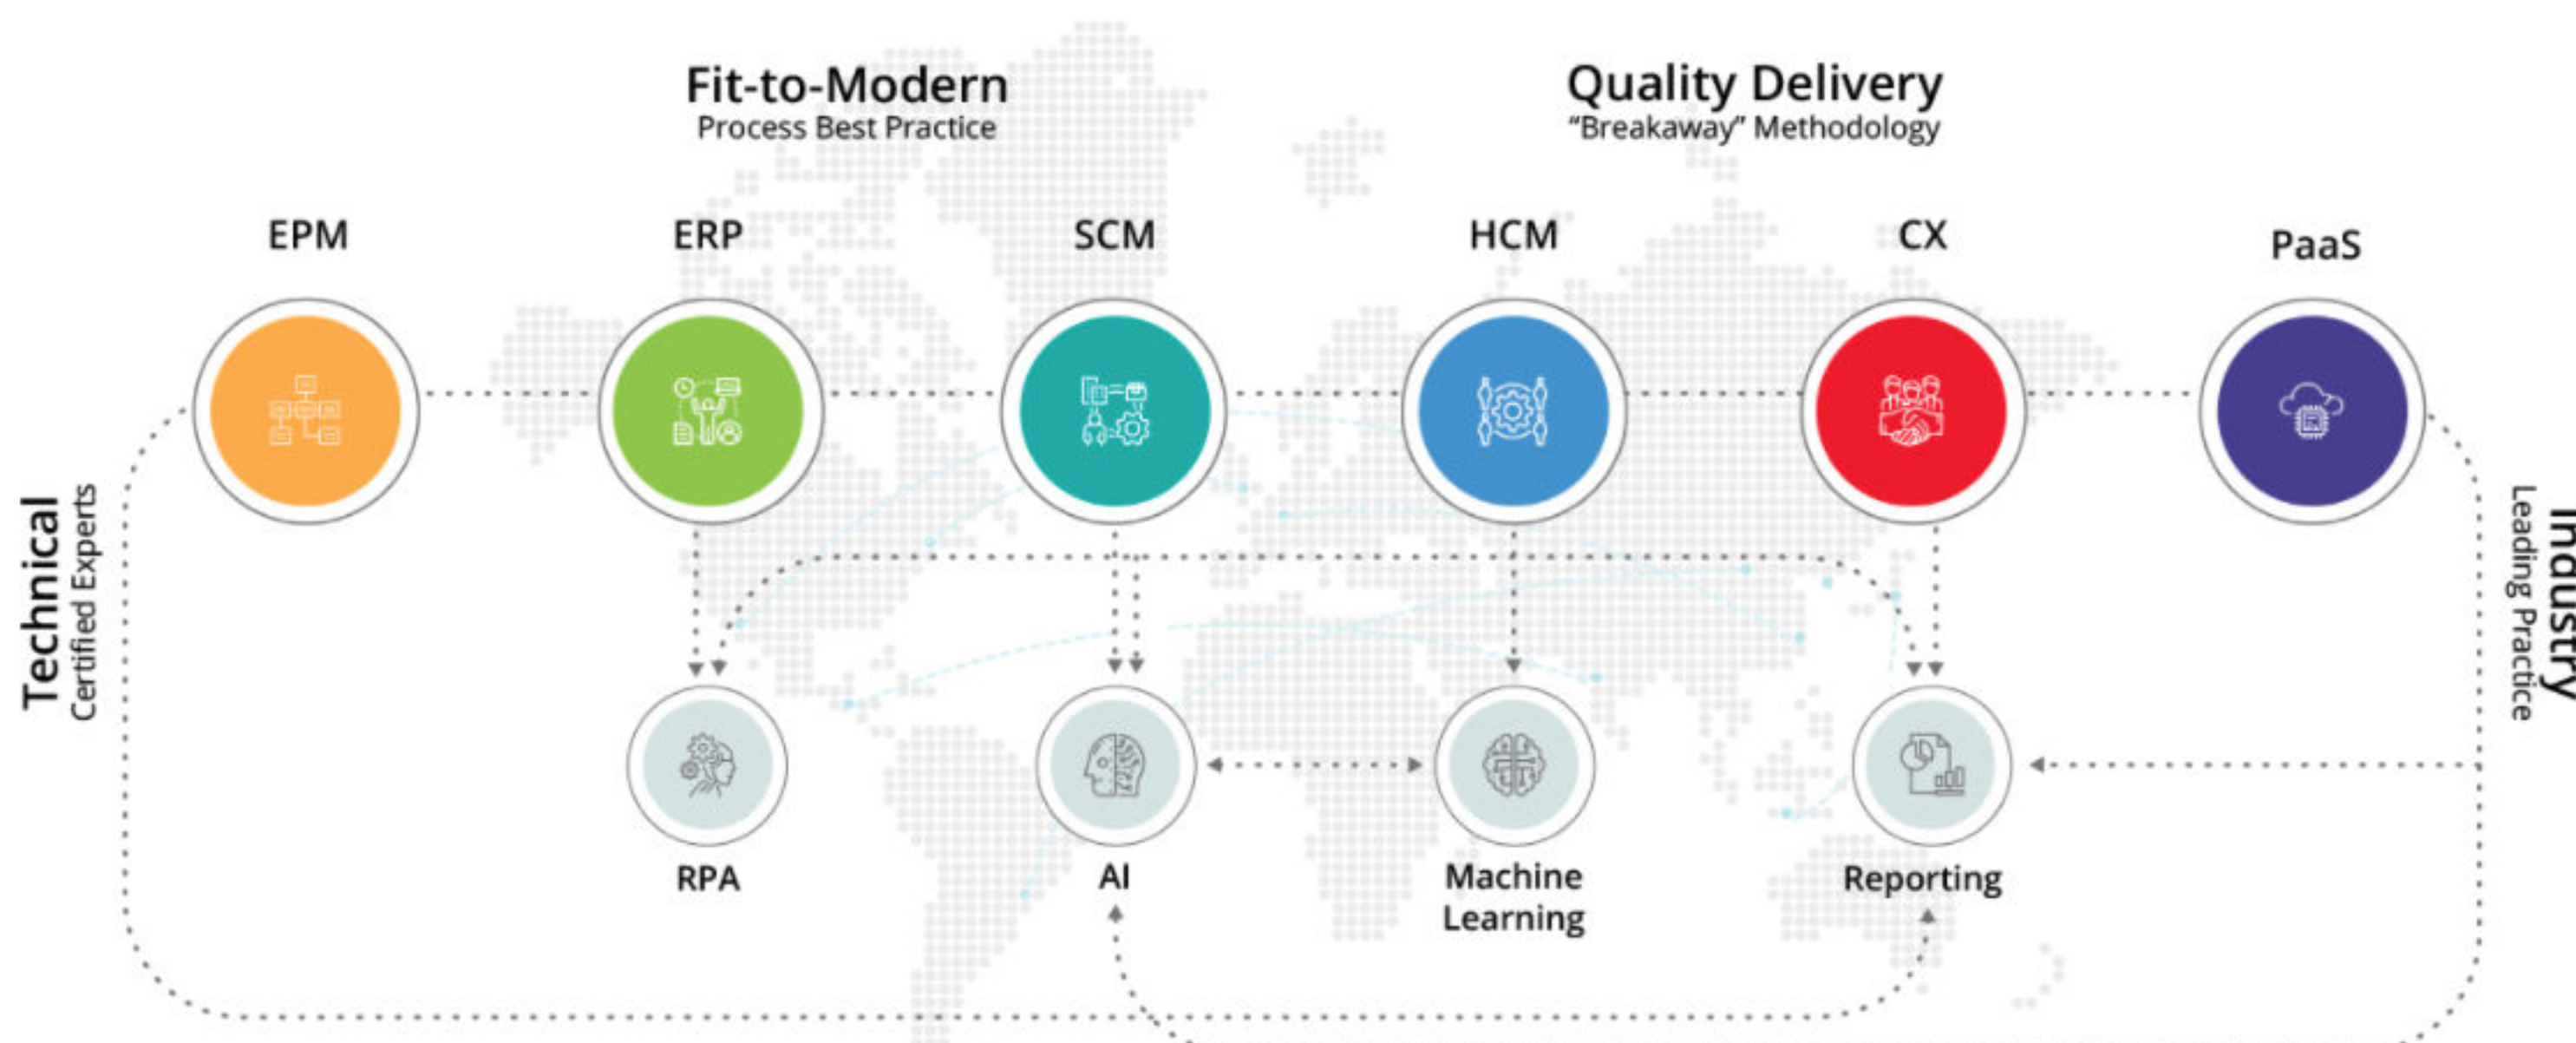

Approach

Digital Transformation demands a firm that can provide robust capabilities to advise on your cloud journey, transform your business, and assure you realize the benefits of your investment.

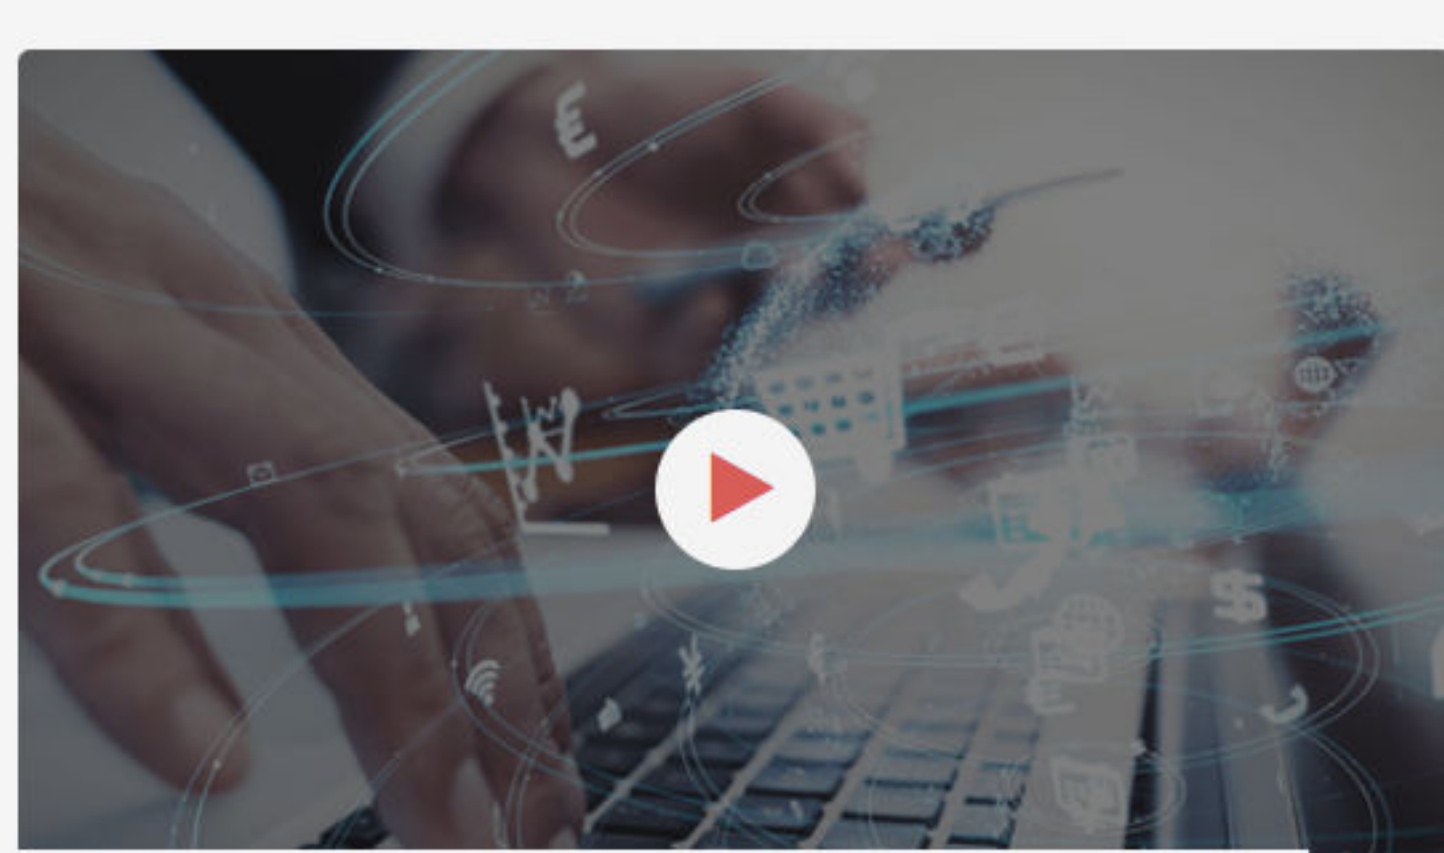

Services

Peloton is a leading professional services firm committed to helping clients leverage modern solutions to realize the value of digital transformation.

Supply Chain Management

Modernize the management of strategic sourcing, manufacturing, integrated logistics, omni-channel fulfillment, and connected demand and supply planning. Leverage a comprehensive suite to deploy functionality incrementally, minimize risk, lower cost, and increase flexibility across your global supply chain.

 Inventory Utilize a comprehensive materials management and tracking tool to maximize margins during fulfillment. The flexible and configurable costing methodologies give finance ability to meet evolving business requirements.	 Procurement Produce operational efficiencies and pro-actively manage suppliers throughout the procurement life-cycle. A fully-integrated platform helps control costs and increase margins.	 Order Management Capture, Orchestrate, Promise and Fulfillment of Orders. Enhance Customer service, increase revenue and provide a complete Order to Cash business process solution.	 Manufacturing Mixed-mode manufacturing capabilities with fully integrated ‘plan-to-produce’ solution. Transform your business from traditional manufacturing to modern best practice of Industry 4.0.
 Demand Planning A complete demand management and forecasting process. Respond faster to the market changes by improving the forecast accuracy. Demand planning best-in-class solution integrated with Supply Chain Planning Cloud.	 Supply Planning Simpler, faster and better supply planning solution for planners. A complete supply planning solution to plan across the supply network and generates plan production, outsourced manufacturing recommendation and also prioritize and reschedules demand based on business requirements.	 Sales & Operations Planning Connect strategy to the operations by implementing Sales & Operations Planning. A consensus driven planning which connects all departments to drive the strategic and profitable strategic unified Supply Chain plan for enterprise.	 Quality Management A unified quality management solution which consolidates and standardize quality information and processes across the enterprise to achieve the industry standard compliance. Connected, modern and insight driven quality management solution.
 Maintenance Connect maintenance, supply chain and finance application to modernize the maintenance process. Predictive maintenance processes to reduce downtime and costs.	 Robotic Process Automation Revolutionize business process automation. With proper design, planning, and governance, software bots can be configured to automate high-volume, business-driven, repeatable processes to optimize workflow.
